

MARKET INSIGHTS: ACTIONABLE INTELLIGENCE FOR THE CRYPTOECONOMY

Amberdata Market Insights delivers deep analytics across digital asset markets, transforming raw data into signals, metrics, and intelligence that power institutional research, trading, and risk management. With history back to the genesis block and real-time updates across CeFi, DeFi, and stablecoins, Market Insights equips you with the clarity and foresight needed to navigate volatile digital asset markets.

KEY FEATURES

DEX & LENDING METRICS

Proprietary metrics across protocols, assets, and pairs with history back to genesis blocks.

SPOT & OPTIONS ANALYTICS

Analytics across liquidity and trading, market cap, supply dynamics, and unique derivatives insights.

INSTITUTIONAL METRICS

Market-wide adoption, ETF flows, wallet participation, miner activity, and sentiment signals.

STABLECOIN ANALYTICS

Unified cross-chain & intra-chain insights into peg integrity, liquidity, usage, and behavioral patterns.

MARKET INTELLIGENCE INTEGRATION

Visualize, explore, and customize all metrics in AmberLens.
