KEY FEATURES

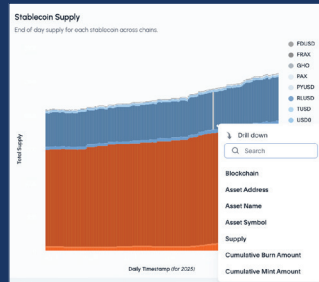

Build custom dashboards, save and share queries, and unlock infinite charts from any dataset to supercharge your crypto analysis.

DATA WEAVER

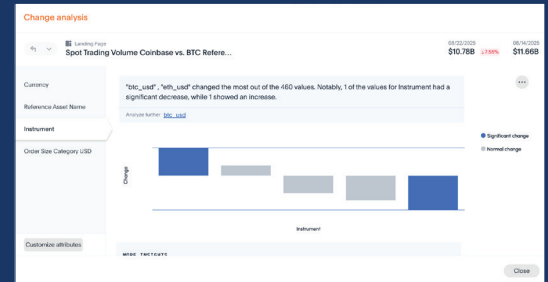

Weaves together disparate data points into a cohesive visual narrative

DRILL DOWN

Slice and dice data across any combination of dimensions without predefined filters... and generate new charts with your queries

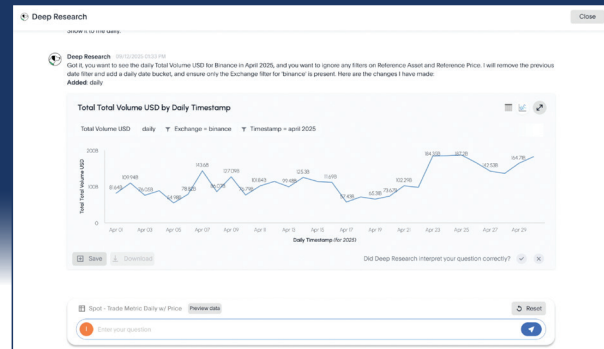

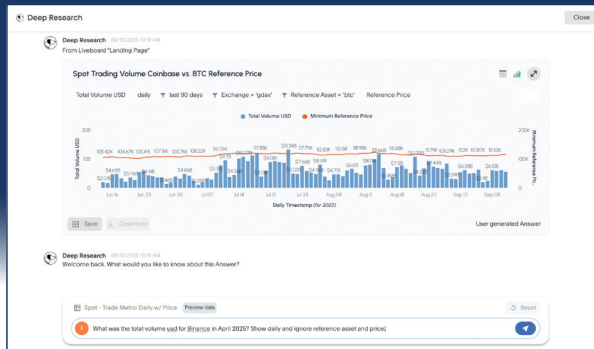

CHANGE ANALYSIS

Select datapoints and get detailed analysis into key drivers of data trends

DEEP RESEARCH: CONVERSATIONAL ANALYTICS WITH ARTIFICIAL INTELLIGENCE

Ask a question of any chart or table and receive comprehensive answers in a no-code chart or table format, including reasoning and filter combination for replication.

SPEND LESS TIME SEARCHING FOR ANSWERS AND MORE TIME ACTING ON THEM

ENTERPRISE-READY DELIVERY

REST APIs & WebSockets for real-time and historical integration.

Bulk & Cloud Access via Snowflake, Databricks, AWS S3.

Customizable Signals to fit your operational workflows and AI models.

Low-latency, high-quality infrastructure built to scale under market stress.
